Marine conservation | Syllabus

The Marine Conservation course equips you with an understanding of key concepts and terminology, tools to analyze a marine protected area ecosystem, and knowledge of global ocean issues and different approaches.

Mc	odules	Lessons	Learning objectives
1.	Introduction to Marine Conservation	 Marine Biodiversity and Conservation Marine Biodiversity Loss Species and Biodiversity Monitoring 	 Explain the importance of marine biodiversity Describe the driving forces behind marine biodiversity loss Explain why monitoring biodiversity is important in conservation
2.	Approaches to Marine Conservation	 Governing Global Marine Biodiversity Marine Protected Areas (MPAs) Benefits of MPAs Successful MPAs Sustainable Local Fisheries 	 Discuss areas beyond national jurisdiction (ABNJ) marine biodiversity challenges Evaluate aspects of marine protected areas (MPA) Identify the building blocks of sustainable local fisheries
3.	Key Threats to Marine Environment s	 Endangered Species Keystone Species Threats to Coral Reefs Community Strategies to Protect Coral Reefs Marine Pollution 	 Describe the main contributors that threaten marine environments Outline main threats to coral reefs Describe strategies for tackling marine pollution
4.	Marine Conservation in the Field	 Case Study: Sustainable Livelihoods for Fisheries Case Study: Atlantic Cod Case Study: Marine Protected Areas Case Study: Plastic Pollution 	 Identify approaches to address sustainable livelihoods for small-scale fishers, marine protected areas (MPAs) and coral restoration efforts Discuss how turtles are being conserved Evaluate an industry-led approach to reducing ocean plastic pollution
5.	Marine Conservation Stakeholders	 Global Ocean Governance Role of Policy and Governments Balancing Policies for Multi-Use Government and NGOs Communities and Marine Conservation 	 Discuss global ocean governance challenges and the role of policy Identify roles that NGOs play in marine conservation Discuss the role of communities in conservation

Conservation and scientific research | Syllabus

The Conservation and Scientific Research course will introduce you to some of the field research techniques used in biological monitoring. You will learn about biological surveys, including species identification, environmental impacts, survey planning, health and safety, and survey logistics.

Мос	dules	Lessons	Learning objectives
1.	Target Species Identifica- tion	 How does monitoring support conservation objectives? What is a Target Species? Target Species in Their Environment Functional Groups Target Species Summary Report 	 Recall how monitoring supports conservation/management objectives Identify why target species are used in biological monitoring Identify key characteristics of target species Comprehend the role target species play in the ecosystem
2.	Survey Techniques	 Best Practice Guidelines for Surveys and Monitoring Comparing Survey Techniques Environmental Impact Analysis 	 Identify which survey techniques to use for different research areas Understand the advantages and limitations of different survey techniques Recognise the environmental and social impacts associated with environmental monitoring
3.	Survey Logistics	 Survey Briefings Survey Aims and Objectives Data Management What Went Wrong? Getting Ready to Lead a Survey 	 Describe terms used for different survey techniques Identify what survey equipment is required Prepare a plan for undertaking a field survey in one of GVI's locations
4.	Project Partner Relation- ships	 Building Capacity Forming Strong Partnerships Introduction to Conservation Partnerships 	 Describe the work goals of one of GVI's partners Understand how the work GVI is undertaking is contributing towards the partner's goals Recognise the benefits collaboration provides to both organisations
5.	Health and Safety Procedures	 Identifying Risk Preparing for the Unexpected Managing Emergencies Emergency Plan 	 Determine the risks associated with biological surveying Prepare for an emergency situation Manage an emergency situation, including post event reporting
